

Report  
**Python basics for beginners Workshop**  
**Medical Education Unit**  
**UCMS and GTB Hospital, Delhi**

Date: 23rd Sep 2023

Time: 2-5pm

Venue: MEU Room, 2nd floor, Library block, UCMS and GTBH

**Facilitators:** Mr Apoorv Chauhan (Third year medical undergraduate student) and Prof Khan Amir Maroof (Coordinator, MEU)

**Participants** list attached at the end of the document.

**Expectations of the participants from the workshop**

The participants in the workshop had various expectations, including a strong desire to learn Python basics, a focus on healthcare analytics, hands-on learning, and the hope of a comprehensive curriculum. Their feedback reflects a mix of curiosity, motivation, and a readiness to explore Python as a programming language.

**What did the participants like about the workshop?**

The participants liked the workshop for its adaptability to various skill levels, informativeness, interactive nature, clarity in explanation, and its ability to ignite enthusiasm for coding. The inclusion of practical exercises, accessibility to beginners, and the effective presentation of content were also key factors in their positive feedback.

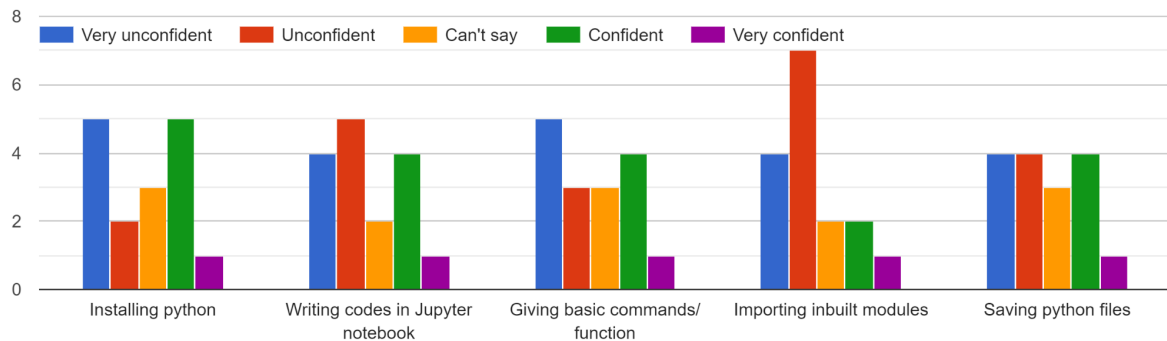

**Participants' suggestions for the workshop on how it can be modified for improving its outcomes.**

The participants' suggestions revolve around enhancing interactivity and problem-based learning, potentially extending the workshop's duration, addressing internet connectivity issues, and providing a venue that can accommodate more attendees.

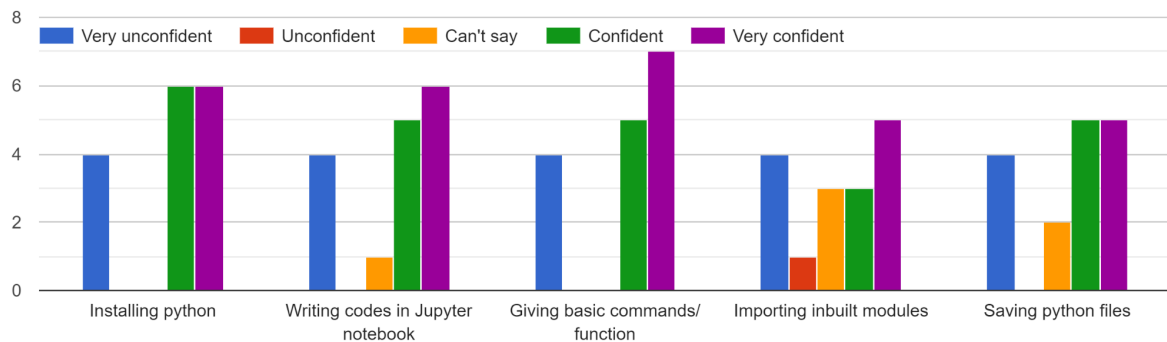

**Average satisfaction level** was 4.6 on a scale of 1 (lowest) to 5 (highest)

## Confidence level of the participants in certain tasks before and after the workshop

How confident were you in these tasks BEFORE the workshop?

How confident are you in these tasks AFTER the workshop?
